Official Paper of the Town of Prescott

ADVERTISERS IN THE reading columns will be charged

the rate of THIRTY CENTS per line for first insertion;

Fifty cents a line for each subsequent insertion.

Local Intelligence.

TUESDAY.

C. Rogers, from the Charmingdale Valley, is in town.

George and William McCloud, from Peeples' Valley.

Charles Goldman, of Williamson Valley, town and informs us that the crops in action are looking fair but need rain.

C. A. Tweed, Judge of the District Court, whose health has been bad, we are glad to learn from his own mouth, is now recovered and feels better than is his wont.

J. Jackson, from Kirkland Valley, was in town this morning, and informs us that the crops in that valley are all dead with the exception of one or two which are on moist land.

James Hansen and family arrived yesterday from the Colorado river. Mr. Hansen has been here some time and has come to make his home in Arizona, there sent for his family.

John Donahue has purchased a valuable ranch recently discovered in Bradshaw mountains, which assays all the way from two to three hundred dollars to the ton. The ranch is called the Mezzepa.

John A. Stevens and C. F. Cate left this morning for Black Canyon on business.

Cate with the intention of purchasing

Swelling station and ranch, and Mr.

Cate to look after his cattle that are be-

reached at that place.

John Bracks.—We noticed at the Peck

Company's office to-day two silver bricks

brought from Peck's at the Aztec mill,

which assays all the way from two to

three hundred dollars to the ton. The

brick is called the Mezzepa.

Cate to look after his cattle that are be-

reached at that place.

John W. H. Hardy of Mohave county, is visiting Prescott. We learn from him that

the Peck Mine has a slate or schist foot wall,

with black granite hanging wall. The vein

is from one to five feet, and the rich pay

streak from one to fifteen inches.

It consists of rich chloride and sulphurite silver,

with carbonate and sulphurite of lead. It is

worked 250 feet down and is 60 feet in

length. Has produced 450 tons of first-class

ore worth \$25,000 in revenue.
